

LED Optimized Drivers

- AC/DC or DC/DC
- Wattages 3W to over 300W
- Constant Current or Constant Voltage
- High Efficiency PFC
- Standard & Custom Designs
- Multiple Dimming Solutions

Driven by Efficient Power

Technology

EPtronics' focus on efficient power starts with our high performance LED drivers. Utilizing the latest solid state designs and next generation circuitry, we are able to offer a blend of efficiency and value. By designing our line to match the latest LED light engines, we offer constant current and constant voltage models in the wattages and voltages needed to power up the most demanding applications.

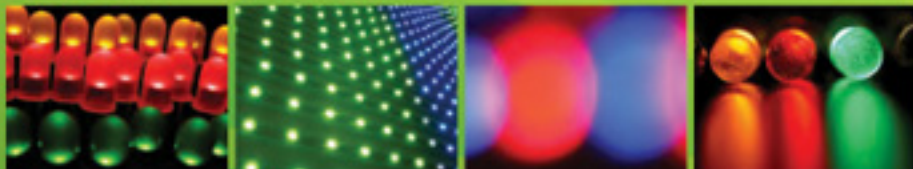

Quality

Our modern manufacturing facilities and automated test equipment combine high quality with efficient production to deliver consistent performance unit after unit.

Designed With Customer's End Product In Mind...

Industry standard sizes and packages to get your products to the market quickly and with maximum customer satisfaction was our design goal from the beginning. Our models are the most versatile in the industry, with a wide input voltage range of 90V to 305V, and 480V with outputs in a multitude of constant currents or constant voltages. With hundred of models, we can satisfy the most challenging of applications. If one of our current designs isn't perfect for your application, our experienced design team can develop a product that will meet your needs.

Experience

We accomplish this by merging our long experience in both power supply and lighting electronics markets. Taking seasoned engineers and giving them the goal of efficient power for LEDs produces a line of LED drivers unmatched by any other company.

Key Features

- High Reliability
- Full regulatory requirements, including UL, cUL, FCC and CE
- Water resistant and dust proof designs
- Universal AC or DC Input
- Compact and light weight
- Constant Voltage or Constant Current
- Non-dimming models or dimming models compatible with ELV, MLV, and incandescent triac dimmers, 0-10V and PWM.

Applications

- Outdoor Area/Street Lighting
- Commercial/Industrial
- Residential
- Retail/Refrigerated Display
- Entertainment
- Architectural
- Safety/Security/Emergency
- Signs/Displays

LD
Series

60W-300W

LG
Series

60W-150W

LM
Series

60W-200W
